FUND MANAGER UPDATE

- This fund dynamically invests across large, mid, and small caps based on relative attractiveness and valuations. Stock selection across cap curves and especially within the mid and small cap ideas are largely based on bottom-up approach. Currently, about two third of the fund is allocated towards large caps and rest across mid and small caps.
- We are overweight in Banks / Financials, Communications and Pharma due to relatively favourable valuations and sector specific tailwinds. We continue to remain underweight in Auto.
- We reduced/exited some weights in certain stocks to book profits or to reduce risk due to near term headwinds.
