The Trustee Report

Dear Investor

FY 10 has been a tepid year for equity funds and a year of restoration of assets in liquid/fixed- income funds.

Ebb & flow with markets: Hurt by the meltdown of 2008 and Q1 2009, investors continue to be cautious about equity as an asset class. This is in line with trends over the past 20 years when investor flows have tended to ebb and flow with the market trends. This is amply clear from the charts on the next page.

This type of behaviour can hurt investors over the long term, as they typically embrace equity in a big way in late stages of a bull market and shy away in a bearish phase. This effectively means buying more at highs and not buying at lows and selling at lows when exactly the reverse will stand investors in good stead.

Despite a sharp recovery from the lows of October 2008, markets continue to be well off peak levels across the world. This does mean a more prolonged holding period for investors who entered Indian equities in the second half of 2007 and early 2008.

Macro-Backdrop & Investing: The global financial crisis and its effect on economies continue to rumble even after four years from the official recognition of the woes.

The developed world appears set for a protracted period of low growth while emerging markets could grow at a higher pace, if they are able to enhance the domestic orientation. In this regard India is well placed.

In this backdrop, there is a need for investors to adopt a long-term perspective to overcome the effects of short-term volatility and expectations of returns will also have to be moderated, as in our view, it would be unrealistic to expect gains of the magnitude enjoyed by investors during 2003-2007 or from the lows of October 2008.

Owning a diversified portfolio that matches your expectations of return and liquidity as well as your risk preferences and adopting a long-term approach of at least five-to-ten years is the appropriate way to benefit from investments in the financial markets.

We seek your continued support and assure you of our commitment to quality products and services from Sundaram BNP Paribas Mutual Fund.

Mutual Fund Industry Flow-Trends: Gross mobilisation by the mutual fund industry during the year amounted to Rs. 1,00,19,023 crore as compared to Rs. 54,26,353 crore in FY 2009, a growth of 84.6%. The industry also witnessed a gross redemption of Rs. 99,35,942 crore representing 82.2% increase over the previous year's level of Rs. 54,54,650 crore. On a net basis, there was an Inflow of Rs. 83,081 crore in 2009-10; this was a significant improvement over the previous year which witnessed a outflow of Rs.28,297 crore.

Trend in fund house flows: In the year 2009–10, Sundaram BNP Paribas Mutual Fund schemes mobilized a sum of Rs. 60,712 crore representing an increase of 48.04% over the previous year's mobilization of Rs. 41,012 crore.

The gross redemption from the schemes in this period was Rs. 62,113 crore as against the previous year's redemption amount of Rs. 39,871 crore, recording an increase in the redemptions to the tune of 55.78%. On a net basis, Sundaram BNP Paribas Mutual fund schemes witnessed an outflow of Rs. 1,401 crore, in 2009-10, as compared to the net Inflow of Rs. 1,141 crore recorded in the previous year 2008-09. This was mainly on account of outflows in the liquid/other short-term funds.

Assets Under Management: The Average Assets Under Management of Sundaram BNP Paribas Mutual Fund in the year ending March 31, 2010 was Rs. 13,878 crore, as compared to Rs. 9,267 crore for the previous year ending March 31, 2009. This represents a growth of about 50% over the previous year. The closing AUM as on March 31, 2010 was Rs.12,770 crore. This represents a share of 2.08% of the mutual fund industry 's assets of Rs. 6,13,979 crore. In equity, the fund house stays in the top 10; this is also true in terms of folios, indicating the retail orientation of Sundaram BNP Paribas Mutual Fund.

Performance of Sundaram BNP Paribas Mutual Fund: During FY 2010, the funds of Sundaram BNP Paribas Mutual Fund managed to stay in line with

the trends in the market. The large-cap funds stayed close to the benchmark in terms of returns. As they adhere to style integrity, they trailed the broad market, which was influenced by mid- and small-cap stocks significantly.

In a year that saw the mid- and small-cap space take off, the funds of Sundaram BNP Paribas Mutual Fund tracking this part of the market outpaced benchmarks (and peer group) by comfortable margins as is evident from the table on Track Record. This, yet again, showcased the class-leading ability of the fund house in the mid- and small-cap spaces.

The culmination was the selection by CRISIL of Sundaram BNP Paribas S.M.I.L.E Fund as the best in the mid- and small-cap category for the CNBC TV18-CRISIL Award. The fund bagged the ICRA Five-Stars Award for performance over a one-year and three-year period.

Sundaram BNP Paribas Select Mid Cap continues to be the highest-rated midcap fund by Value Research, a distinction that has been maintained for close to five years now.

Two new thematic funds launched in 2008 to track financial services and entertainment have performed well, benefiting from a conservative approach in 2008. This has helped them to be in the first quartile on a comparison with 320-plus funds, which were available on their launch dates for investors to consider.

Sundaram BNP Paribas Energy Opportunities has participated in the rally completely despite staying true to the theme in portfolio construction. It is an early quartile 2 performer among equity funds from its launch date. This is a creditable performance, especially as opportunities to participate in top performers in the recovery such as infrastructure and financial services stocks were limited for this fund.

Sundaram BNP Paribas Select Focus and Sundaram BNP Paribas Tax Saver – acclaimed and awarding winning funds in 2006, 2007 and 2008 – trailed benchmarks during the year on account of deep cash calls and more conservative portfolio positioning that meant lack of participation in the early stages of the rally since March 2009. The trail has, however, not impaired the impressive credentials over longer time periods of both the funds.

Sundaram BNP Paribas Tax Saver now sports a 10-year plus track record and is a top quartile fund across periods except the latest one year.

On the fixed-income side, Sundaram BNP Paribas Ultra-Short Term maintains a consistent trend and has been a top quartile performer since launch. We have repositioned two of our existing funds. Sundaram BNP Paribas Floating Rate Fund – Short Term Plan is now Sundaram BNP Paribas Flexible Fund – Short Term Plan. Following the shift, the fund has emerged as a top quartile performer and there has been sharp rise in fund size.

Sundaram BNP Paribas Floating Rate Fund – Long-Term Plan has been repositioned as Sundaram BNP Paribas Flexible Fund – Flexible Income Plan, a dynamic fund. Given its low fund size, we are in the process of improving the performance. Small size is a constraint, which we expect to overcome in the years ahead.

During the year, Sundaram BNP Paribas Mutual Fund launched the sixth fund in its Select Thematic Funds umbrella. Sundaram BNP Paribas PSU Opportunities – dedicated to track PSU stocks – received an encouraging response with a fund size of Rs 499 crore mobilised during the New Fund Offer Period.

Annexure A summarizes the investment objective, asset allocation and performance of the schemes. The Revenue Account of the Sundaram BNP Paribas Mutual Fund schemes for the year up to March 31,2010 and the Balance Sheet as of that date are also an integral part of this report.

The fund house continues to invest in building its in-house research skills as well as contemporary trading and monitoring systems for the fund managers, dealers and compliance. This will be the key focus area on a continuous basis, as it is critical to handle investor funds with optimum skill sets and responsibility.

Outlook: As of March 2010, the Indian markets can be broken into two buckets from a valuation perspective – large-cap stocks that are fairly valued relative to their current level of earnings and mid- and small-cap stocks that are cheap across several parameters. We think there could be a fairly

prolonged time correction for the large-cap stocks rather than absolute price correction. Hence short-term returns may prove to be elusive.

We remain cautious on markets in 2010 in the India context and are fairly confident of its performance in FY 2011 and beyond. Our concern is lower growth and margin compression eroding earnings growth and hence resulting in a correction. We are seeing this trend in the cement and telecom sector and in some other sectors as well. In cement, fresh capacities are also being added and while the industry is confident of maintaining pricing power, it will be difficult in an era of lower capacity utilisation.

Hence our central thesis for this year is one of cautious look out for opportunities-identify good companies with robust earnings growth and buy them at attractive prices. There can be no substitute for this common sense.

FII flows will remain volatile on account of the global uncertainties. Indian markets remain very dependent on FII inflows as domestic savings in equities has declined significantly on account of new marketing procedures in mutual funds and insurance policies. While there is a growing consensus on the longer-term prospects of Indian companies, the relatively higher valuation is delaying inflows.

We also remain worried on the amount of equity issuances that will take place globally as companies try to repair their balance sheets. China and India will continue to remain capital hungry markets and any change in risk perception could dent market sentiments sharply.

On a medium-term perspective, we are more optimistic. We think India is becoming a more favoured destination, as money moves from some of the mature markets to India.

Infrastructure development, although slow, will continue to become a larger theme in the private sector. We are also positive on the consumption theme which will play an integral role in economic development as better infrastructure is rolled out. While markets are expensive on a short-term basis, they are not, when adjusted for the growth potential.

We therefore recommend that investors continue to increase their equity exposure during this period of consolidation. Thanks to the slow rate of development in India, the potential for growth is larger and likely for a longer period. That is an opportunity for investors, as corporate profitability will be more secular and remain so longer rather than getting competed away.

The Wise Investor: For a more detailed view of the outlook on markets, global economy and Indian economy, please read The Wise Investor available at www.sundarambnpparibas.in and The Market Outlook. We are happy to inform you that The Wise Investor, a publication of the fund house is now mailed in printed form to 4 lakh investors, reaches another 4 lakh investors by e-mail (the soft copy version is an expanded 36-page version with deeper views and analysis) and is also available online at www.sundarambnpparibas.in.

Investment Approach: As always, we wish to emphasise that realistic expectation of return aligned to long-term trends and long-term horizon is important for wealth creation.

Regulatory framework: The last year has been a period of the most significant changes in the regulatory framework for mutual funds in India. SEBI has been active in tilting the framework in favour of investors in a pronounced manner. A few of the notable initiatives are:

- At the first stage, abolition of entry load for direct investment in the mutual fund and then abolition of entry load as a concept for all investment in mutual funds;
- Introduction of a system of commissions that are paid to distributors by investors and not by the mutual fund;
- Intervention to prevent a hike in exit loads by mutual funds;
- · Tightening of the regulations for liquid funds;
- · Clarity on calculation of distributable surplus for payment of dividend;
- Enhanced disclosures, especially of portfolio information at the website of the fund house and at www.amfiindia.com
- Publication of information on investor base of different fund houses;

The Trustee Report

• Enhanced level of distributor-level compliance requirements;

Investor Services: The investor base of the fund house based on number of folios has marginally risen from 2.25 million in 2008–09 to 2.34 million in 2009–10 indicating increased retail participation and continued confidence reposed by investors in the fund management expertise. During the year, the Investment Manager opened 11 branches and closed 9 branches, taking the total number of branches to 57 as at the year end. 1.4 INVESTMENTS

- Investment transactions are accounted on trade dates at cost including brokerage, stamp duty and other levies.
- (ii) Bonus/Rights entitlements are recognised on ex-bonus/exrights dates.
- (iii) Investments are marked to market. In valuing the scheme's investments

a) Government Securities

- Government Securities are valued at the prices obtained from CRISIL in accordance with the guidelines for valuation of securities for mutual funds issued by SEBI.
- Instruments bought on 'repo' basis have been valued at the resale price after deduction of applicable interest up to date of resale.

Annual Report 2009-10

b) Other Securities:

 Traded Securities are valued at the last quoted closing price on the stock exchange. Nontraded / thinly traded securities are valued in good faith on the basis of guidelines issued by SEBI in this regard.

In accordance with the guidance note on accounting for investments in the financial statement of mutual funds issued by The Institute of Chartered Accountants of India, the investments are valued separately category-wise and the net unrealised appreciation is directly transferred to unrealised appreciation reserve and the net diminution is debited to revenue account.

c) Equity Derivative Instruments

- Open positions of traded equity index/stock futures are valued at the last quoted closing price at the stock exchange.
- Equity derivative instruments are valued separately category-wise and the net unrealised appreciation is directly transferred to unrealised appreciation reserve and the net diminution is debited to revenue account.

1.5 **LOAD**

In terms of SEBI circular dated 30th June 2009, out of the exit load charged to the investor, a maximum of 1% of the redemption proceeds is maintained in a separate account which can be used by the AMC to pay commission to the distributor and for marketing and selling expenses of the scheme. Any balance in excess of 1% is credited to the scheme immediately and unutilised portion in the load account shall be credited to the scheme whenever felt appropriate by the AMC.

1.6 EQUALISATION ACCOUNT

In terms of SEBI circular dated 15th March 2010, on Unit Premium Reserve, the equalisation account has been credited/debited with an appropriate portion (excluding the Unit Premium Reserve and Unrealised Appreciation) of the sale proceeds/repurchase price in respect of units sold / repurchased on or after 15th March 2010. The net balance in this account is transferred to revenue account for the Year.

1.7 UNIT PREMIUM RESERVE

In terms of SEBI Circular dated 15th March 2010, on Unit Premium Reserve, when units are sold / repurchased on or after 15th March 2010 a part of the sale price / re-purchase price representing unrealized gains is credited/debited to Unit Premium Reserve. The balance in Unit Premium Reserve will not be utilised for determination of distributable surplus.

1.8 Investments in Units of Overseas Mutual Funds

Investments by the SBNPP Global Advantage Fund are in the nature of units of overseas mutual funds. These securities are valued at the last disclosed net asset value at the local currency and converted into Indian Rupee value by applying the RBI reference rate/Cross currency rate through Bloomberg.

1.9 Foreign Exchange Transactions

Transactions expressed in currencies other than Indian Rupee are translated into Indian rupees at the exchange rates applicable on the transaction dates. Exchange differences arising on settlement of transactions are recognized as income or expense.

Assets and liabilities designated in currencies other than Indian Rupee are translated into Indian Rupee at the exchange rates at the end of each year.

Exchange gain or loss on account of changes in the foreign exchange rates is considered as income or expense in the revenue account. The unrealized appreciation arising in foreign exchange rate is reduced for calculating the distributable income.

Notes on the policy changes:

(i) Load collected and utilised

In terms of SEBI guidelines dated 30th June 2009, from 1st Aug 2009 out of the exit load charged to the investor, a maximum of 1% of the redemption proceeds are maintained in a separate account for each scheme, which can be used by the AMC to pay commission to the distributor and marketing & selling expenses of the scheme and any balance is credited to the scheme, as against the previous practice of crediting the entire amount to load upto 31st July 2009 under other liabilities (other than the amount utilised for meeting commission to distributor and marketing and selling expenses which was included under unit premium reserve)

As a result, the other income is higher with consequential impact, as detailed in the table given below, on the surplus, Reserves and Surplus, Current Liabilities and Provisions, Net Asset Value and Distributable income.

(ii) Equalisation Account / Unit Premium Reserve

In terms of SEBI Circular dated 15th March 2010, when units are sold / repurchased an appropriate portion (excluding Unit premium Reserves and unrealized appreciation) of the sale proceeds / re-purchase price is credited / debited to equalisation account as against the policy of crediting/ debiting the entire difference between the sale price/repurchase price

and face value of the units to equalisation account followed in the earlier years.

As a result of above change, the surplus transferred to Balance Sheet is higher/lower with consequential impact on Unit Premium Reserve and distributable surplus as detailed in the table given below. However this does not have any impact on total Reserve and Surplus and Net Asset Value.

TABLE - Impact on account of the changes.
